Terms & Certifications

Key definitions and standards for compostable foodservice packaging.

1. Renewable Resources

Many of our products are made from renewable resources such as bagasse, paper, PLA, bamboo, and wood fibers.

4. ASTM D6400

This standard applies to compostable plastics and bio-based materials such as PLA.

2. Commercially Compostable

Commercially compostable products are tested to ASTM compostability standards and are intended for composting in commercial facilities only.

5. Third-Party Certifications

Third-party certifications help verify compostability claims and ensure products meet recognized industry standards.

3. ASTM D6868

This standard applies to compostable products that combine paper or fiber with a compostable coating or lining.

6. BPI Certified Compostable

Products carrying this certification have been reviewed by the Biodegradable Products Institute and certified as compostable according to U.S.

**RENEWABLE
RESOURCES**

**PAPER & FIBER
WITH COATING**

**COMPOSTABLE PLASTICS
& BIO-BASED MATERIALS**

**BPI
CERTIFIED
COMPOSTABLE**

Compostable items are intended for commercial composting where facilities exist.

Bagasse Fiber

PFAS-Free Performance

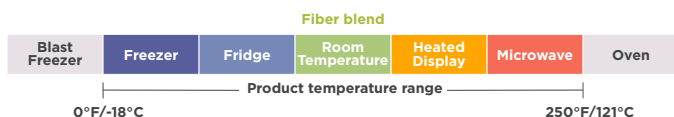

Planet Choice™ PFAS-free fiber containers and tableware are made with an advanced proprietary blend designed to stand up to greasy, wet, and heavier foods while delivering dependable performance for everyday foodservice use.

Commercially Compostable

BPI-certified to be commercially compostable only. Facilities may not exist in your area. Not suitable for home composting. Compostable products facilitate the diversion of food scraps from the landfill.

Solutions for Customers

Planet Choice™ PFAS-free fiber products reflect our focus on giving foodservice operators reliable packaging options that meet their everyday needs and support their sustainability goals.

Bagasse Fiber

Compostable Bagasse Hinged Containers

Item	Brand	Description	Dimensions (in)	Color	Case Pack
CNTBB991C	Planet Choice	9"-1 compartment, bagasse hinged container	9 x 9	Natural	200

Paper

Commercially Compostable

Safra's paper collection includes compostable paper food containers, PLA-lined cups, lids, and paper-based takeout packaging designed for commercial foodservice use. Select items are BPI-certified and made to meet today's compostable packaging requirements where accepted.

Wide Temperature Tolerance

Packaging that works for both hot and cold applications such as soups, soda, hot cocoa, coffee, fries and more.

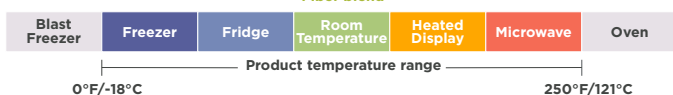

Great On-The-Go Options

From soup cups, hot cups, tableware, or tamper-evident fry cartons, we have reliable options for you to choose from.

PLA

Made from Plants

Made from polylactic acid (PLA), a resin derived from annually-renewable plants.

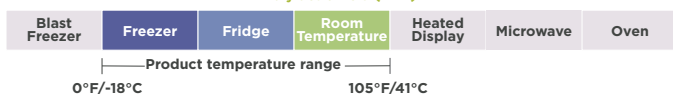

Commercially Compostable

BPI-certified to be commercially compostable only. Facilities may not exist in your area. Not suitable for home composting. Compostable products facilitate the diversion of food scraps from the landfill.

Perfect for Cold Menu Items

Best used for cold applications like icy cold beverages, sandwiches, and salads with a heat tolerance up to 105°F.

Polylactic Acid (PLA)

Bamboo & Wood

Plant-based material options

Bamboo and wood products provide a natural look and feel while helping operators offer more sustainability-minded options. These items are a good fit for restaurants, cafés, catering companies, hotels, airports, and other foodservice operations looking for simple disposable products made from renewable materials.

Reliable for daily food service use

From cutlery and stirrers to picks, skewers, and straws, these products are practical options for restaurants, cafés, catering, and hospitality operations.

Clean presentation

The natural finish gives these items a more elevated feel, making them a good fit for both casual service and more polished food presentations.
